Select the Basemap Widget → ***Choose a Basemap** → **Imagery basemaps provide context for ground features** → **Topography and Terrain basemaps provide elevation details** → **Street and Navigation basemaps provide transportation network details** → **Dark mode basemaps are used for high contrast mapping**

What is the basemap widget?

The basemap widget presents a collection of map images that the user can use as a background for the data layers in their map. It is often used to display aerial photos, topography, street maps, and high contrast maps behind the data layers.

- * Some of the more popular basemaps include:

  - Imagery Hybrid

  - Light Gray Canvas

  - Open Street Map

  - USA Topo Maps

  - USGS National Map

  - Terrain with Labels
